

# Forensic Loan Audit

## *We Take a Different Look!*

Did you know that homeowners who are “underwater” but with no real hardship, have the option for a loan modification? Well in fact they do and you can help!

Many loans funded between the years of 2000-2007 were performed with legal violations. The majority of those loans have significant State and/or Federal violations resulting from greed, carelessness or just innocent oversight by the lender.

In simple terms, this gives us the leverage necessary to force the lender to modify.

Our Approach:

Step I- You sell the homeowner on an HRP audit.

Step II – You review audit with home owner.

Step III -Depending on the severity of the violations the homeowner decides to pursue a modification .

Step IV- You sell your client a HRP Loan Modification.

These loans with violations are unenforceable. You have questions, we have answers.
